

Print Reading for Industry and Construction

Print Reading for Industry and Construction

This intermediate-level course is taught of a semester of mechanical print reading paired with a semester of construction print reading. This course is offered as dual-credit for both DRFT 105 and DRFT 151. Students will complete various mechanical tasks from dimensioning parts and adding tolerances to proof reading and producing drawings. In the spring, students will be revising floor plans, building model houses, and learning about the needed materials for architectural and civil projects. Prerequisite: CAD Fundamentals, Technical drafting, OR 11th/12th grade. Cost to student: \$25.00 per course

Course ID# = PRTRDG-GN-Y
